

# HAZMAT EMPLOYEE TRAINING UPDATED WORKBOOKS

## Workbooks Tailored to Specific Industries

**Petroleum • Propane • Petroleum & Propane • Compressed Gases • Construction • More!**

Do you have concerns that your hazmat employee training does not meet the USDOT requirements ... or that it's not as effective as it should be?

Most companies struggle with providing meaningful hazmat employee training that meets the DOT training requirements. Many companies address hazmat employee training in a way that does not fully comply with DOT regulations, and some are not addressing hazmat employee training at all.

New hazmat employees must be trained within 90 days of hire. Existing hazmat employees must receive recurrent training at least every three years (49 CFR §172.704). Some hazmat employers are under the false impression that the commercial drivers license and hazmat endorsements satisfy the DOT training requirements. Unfortunately, they do not.

Over 30% of all fines levied by DOT are violations where companies fail, or fall short, in their efforts to comply with the hazmat employee training requirements.

Our Hazmat Employee Workbook is a break-through product, providing unprecedented ease of use, at a cost you can afford. You don't have to spend your valuable time struggling to tailor a training program.

Our workbook includes:

- Easy to use format
- Tests for each chapter, bound into workbook
- Certification document, bound into workbook
